EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Rod Baker on March 17, 2005.

The application has been amended as follows:

The title of the invention has been changed as follows: ~~--A Method for making a multi-pass exhaust gas recirculation cooler.--~~

In claim 7, lines 5, 7, and 11, "fluid" (all occurrences) has been changed to ~~--gas.--~~

Remarks

2. The amendment to the title was made to reflect the claimed invention. See e.g., claim 1 ("A method for making a multi-pass head exchanger core ..."); claim 4 ("A method for making a multi-pass folded flow exhaust gas recirculation cooler ..."; claim 7 ("A method for making a multi-pass cross-flow heat exchanger core ...").

3. Claim 7 was amended to further distinguish from Sasaki et al. In that reference the heat exchanger is a condenser, in which a heated gas enters, cools and under goes a phase change. See Response dated December 30, 2004, page 9. Although, there is a difference in the ratio range of the inlet to outlet area of Sasaki and Applicant, there is some overlap in the area around 60%. Applicant amended claim 1 to reflect this that

there is no phase change to define over Sasaki. This amendment essentially parallels that amendment.

4. Applicant's amendment and argument in support thereof dated December 30, 2004, have been found persuasive.
